Hareem Bokhari
Homework 9

Week of Monday 9/9/19 to Sunday 9/15/19
- Set up Github Repository for class project.
- Discuss roles with class and generate ideas for project as well as what language it would be written in and the technologies used to create the app.

Week of Monday 9/16/19 to Sunday 9/22/19
- Product/Specifications agree on project and the features it may have as well as finalize the programming language used to create the app.
- Agree on which possible test cases are possible ie: user authentication, etc. as well as manually testing front end features to test if functions as required.

Week of Monday 9/23/19 to Sunday 9/29/19
- Set up Github Repository for Quality Assurance.
- Discuss which team members have what previous knowledge regarding testing specific languages as well as which team members are comfortable using python/pip, MySQL, HTML/CSS.

Week of Monday 9/30/19 to Sunday 10/06/19
- Front end testing was assigned to me, Hareem and Katie, who was the team leader therefore was in charge of the commits, so there is less confusion between team members.
- Met with group to discuss potential test cases based on the design product/specification team delivered, Katie committed (see hash commit 91585c51726cb71a6f61b8793a198efbdc9d1f6f)

Week of Monday 10/07/19 to Sunday 10/13/19
- Since frontend team supplied us with the login section we began testing, researching how to conduct test cases in python and flask.
- Since front end team had a lot of more features to add, UI testing was put off until next week, but planning was in session.

Week of Monday 10/14/19 to Sunday 10/20/19
- More features were supplied by the Product/Specifications team.
- Brainstorming ideas for more test cases, communication via Slack.
- Less testing done because of heavy workload for different classes - MIDTERMS

Week of Monday 10/21/19 to Sunday 10/27/19
- Brainstorming ideas for more test cases, communication via Slack.
- Less testing done because of heavy workload for different classes - MIDTERMS

Week of Monday 10/28/19 to Sunday 11/3/19

- App routes were changed and so there were some technical difficulties getting everyone on the same page and getting the app to run.

Week of Monday 11/4/19 to Sunday 11/10/19
- User authentication was added by the Back end team, created try/except/finally cases for development debugging.
- Communication with team, discuss plans for future testing.

Week of Monday 11/11/19 to Sunday 11/17/19
- Created potential tests #2 (see hash commit 1b540673a38b9c9fa74e11adbb245604e65ab353)
- Test user authentication (see hash commit 7c91debc7f0fabc4ed6313770334144714738bb5)

Week of Monday 11/18/19 to Sunday 11/24/19
- Testing Front end features, screenshots of manual testing as well as how the information looks. Helped Front end team with features that had errors and debugged, communication via slack (see hash commit 03e90b64a5023525bac840579676a62217d3f4ca)

Week of Monday 11/25/19 to Friday 12/06/19
- Thanksgiving break
- Met with team in order to discuss conclusion of testing based on features that were uploaded to GitHub by Thanksgiving break.
- Created presentation slides via Google Slides.
